LINUX INSTALLFEST

The **Natick Free and Open Source Software User Group** [NatickFOSS.org] and the **Boston Linux and Unix User Group** [BLU.org] invite you to Linux InstallFest! Volunteers will help you install Linux on your computer and work to solve other FOSS hands-on issues.

LinuxFest is also an opportunity to share our collective experience in a hands-on learning environment, in the grand tradition of the UNIX community.

Please bring your complete system including monitor, keyboard, mouse, power cords, etc. We'll provide a Linux distribution or you can bring a .iso file of your favorite Linux distro. We'll help you load all needed software onto your system. Linux is available as a free download from:

Fedora - [fedoraproject.org]

Open SuSE - [opensuse.org]

Ubuntu - [ubuntu.com]

We have limited space and limited lunch, so first come first served. Sign up online at morseinstitute.org/events

Saturday, February 10
10:00am—4:30pm
Innovation Studio, second floor
